

# Make a Poppy

1. Paint or colour the petals of your poppy red.
2. Once your petals are dry, cut them out.
3. Cut out the centre of your poppy along its outer-edge and along the white lines.
4. Arrange your petals into the shape of poppy, making sure that the dots at the bottom of each petal overlap.
5. Position the circle at the poppy's centre.
6. Use a split pin to pierce the centre of flower and the petals underneath.
7. Attach a green pipe cleaner or a rolled piece of green crepe paper to the back of your poppy, using tape or glue, to create its stem.
