

Find current and relevant TV content

TV is full of valuable content for educators. Whether it be documentaries, news, or feature films, ClickView delivers that content to your staff's fingertips.

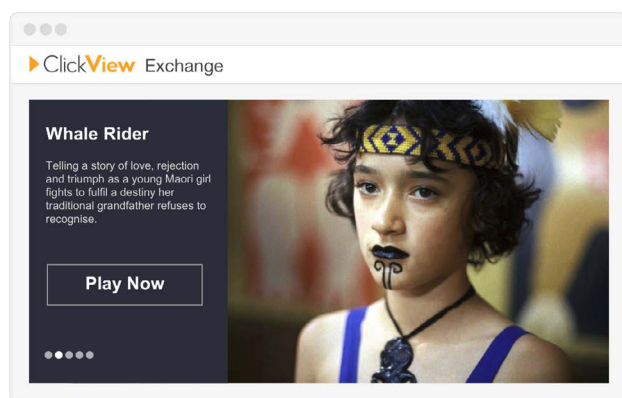

Real-life application of concepts for student learning

TV programmes are available shortly after airing so you can embed the most recent clips into your lessons or lectures. Using ClickView's subtitle search allows you to pinpoint the exact piece of content that is relevant to your class, which you can then share with students.

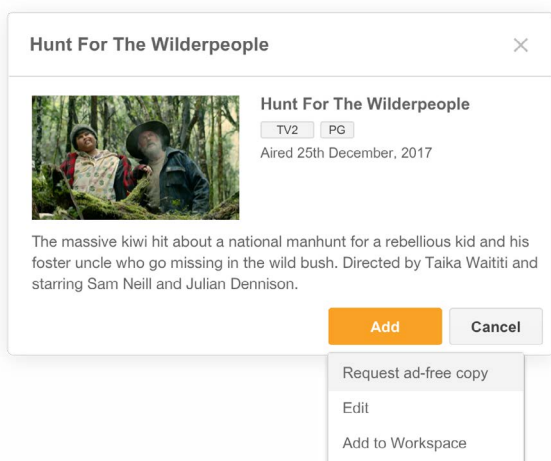

Browse and watch content contributed by our community

Educators across New Zealand have uploaded over 4,000 of the best educational programmes, with new content added every day! This includes 254 feature films uploaded by the community to support your class set texts.

We're happy to remove all the adverts for you

With ClickView TV, you and your staff can request ad-free recordings of any programme from the last 14 days. Our team will do all the manual work in editing out a programme's adverts and selecting the audience rating, saving you time and leaving you with classroom-ready recordings.
