

# PANDEMONIUM WITH PENTOMINOES!

---

**Pentominoes** are different figures that can be made using five identical squares. The catch? The squares must be connected in a certain way to be considered a pentomino.

## THE CHALLENGE:

Cut out the squares below and construct as many pentominoes as you can with them. For every pentomino you create, draw it on some grid paper.

## THE RULES:

1. Every square needs to touch another on at least one side.
2. The squares cannot be connected only by corners or half-way off the sides.

How many pentominoes can you make?
